

Boroondara Urban Design

Awards 2016

(Awards & Commendations)

Category 4

**Best institutional development –
schools, hospitals etc.**

Project: Strathcona Girls' Grammar School Learning Centre

Entrants: PMDL Architecture & Design

The project has created a spine connecting the different parts of the school, terminating with a very successfully configured terrace and tiered seating, providing the interface between the Library Resource Hub, Café and the all-weather recreation areas.

This new zone has become a heart for the school and a convivial space enjoyed by students. The space has been enhanced by the visual connection to the oval and the quality of the finishes used.
